

# Solar Automatic watering system

FOR USE WITH RAIN BARRELS AND  
OTHER NON-PRESSURED WATER SOURCES\*

\*DRIP WATER UP TO 4m ABOVE SOURCE

POT PLANTS

GREENHOUSE

HANGING BASKETS

Automatic watering  
for up to 5 large  
hanging baskets or  
12 x 20 litre pots

“A clever idea which really works”

“Set up was simple”

“The baskets watered by the unit are in much better condition than those I looked after”

“excellent idea - not only safe, but efficient, resource conscious and leaves you to get on with more important things while the plants get on with growing. Superb!!”

“Much more reliable than the kids or the neighbours. I can go on vacation and not worry about my plants”

# Solar Automatic watering system

FOR USE WITH RAIN BARRELS AND OTHER NON-PRESSURED WATER SOURCES\*

\*DRIP WATER UP TO 4m ABOVE SOURCE

The complete irrigation kit for use with a rain barrel or tank:

- 1 x Solar pump unit with rechargeable battery pack
- 1 x Anti siphon device
- 1 x Inlet filter
- 1 x 15m tube
- 12 x drippers, stakes, and tees

The SOL-K12 waters automatically every 3 hours. The amount of water applied varies depending upon the amount of sunshine and the position of the control knob. The SOL-K12 can supply up to 36 drippers and is suitable for beds, baskets, vegetables, pots, grow bags, specimen plants, and tree establishment. The SOL-K12 supplies enough water for 5 large hanging baskets or 36 x 5 litre pots.

Place the SOL-K12 in a sunny location near your rain barrel or non-pressurized water supply. Insert the inlet filter and tube into the water source and arrange the drip tubes as required to irrigate your plants. Switch on the unit and that's it... your plants will be automatically watered.
